FRANCEGO VIP TRANSFERS & TOURS

Complete Platform Technical Manual & Reference

Enterprise architectural reference manual covering VPS server hardening, PostgreSQL manual deployment, REST & B2B Partner APIs, database schemas, and multi-language translation.

ENTERPRISE EDITION | POSTGRESQL 16 NATIVE | HYBRID I18N SYSTEM

1. Architectural Overview & System Modules

FranceGo VIP Transfers is a high-availability chauffeur reservation platform optimized for Paris airport transfers (CDG, Orly, Beauvais), Disneyland Paris shuttles, and curated day trips across France.

Core Architectural Modules

Module	Technology Stack	Role in System
Front-End UI	Next.js 15, TailwindCSS, Lucide Icons	High-converting, responsive booking engine, route showcases, and fleet details.
Back-Office Portal	React Server Components, JWT Auth	Secure dispatch dashboard for booking tracking, CSV export, and price management.
Database Layer	Native PostgreSQL 16 via Prisma ORM	Zero SQLite in production; pre-seeded with 25 routes, 14 hubs, and customer reviews.
Partner API	REST Endpoints, Timing-Safe API Keys	B2B integrations for third-party travel agencies, hotels, and affiliates.
Hybrid i18n	React Context + Google Translate Bridge	Instant native translations across 6 languages + dynamic database auto-translation.
Reverse Proxy & SSL	Nginx, Let's Encrypt Certbot	TLS 1.3 termination, HTTP/2 multiplexing, and reverse proxying to port 3000.

Hubs & Airport Coverage

Hub Code	Hub Name	Category	Key Operating Features
CDG	Paris Charles de Gaulle Airport	AIRPORT	Terminals 1, 2A-2G, 3; Flight tracking & Meet-and-Greet included.
ORY	Paris Orly Airport	AIRPORT	Terminals 1-4; Fast express routes to central Paris & Disney.
BVA	Paris Beauvais Tillé Airport	AIRPORT	Low-cost carrier gateway; Long-distance fixed shuttle rates.
DLP	Disneyland Paris Hotels & Parks	AMUSEMENT_PARK	Marne-la-Vallée, Val d'Europe, Disney partner hotels.
PAR	Paris City Center	CITY_CENTER	All 20 arrondissements door-to-door hotel & residence service.
GDN	Gare du Nord & Paris Train Stations	TRAIN_STATION	Eurostar, Thalys, Gare de Lyon, Gare Montparnasse.
VERS	Château de Versailles	PALACE	Palace excursions, private chauffeur wait-and-return options.

2. Server-End Security & Sudoer Hardening

Sudoer Hardening Guidelines

Running server processes under `root` creates substantial risks if any package dependency contains a vulnerability. By isolating the application under user `francegotransfers` with password-enforced `sudo`, any exploit is contained within the restricted user sandbox.

> **SECURITY GOLDEN RULES**
>
> 1. Never run `pm2 start` as `root`.
> 2. Never use `NOPASSWD: ALL` in `/etc/sudoers`.
> 3. Keep `.env` permissions set strictly to `chmod 600`.
> 4. Keep PostgreSQL port `5432` and Next.js port `3000` blocked by UFW.

Server Hardening Script

```
# 1. Lock down environment variables
chmod 600 /var/www/francego/.env

# 2. Assign project directory ownership to deploy user
sudo chown -R francegotransfers:francegotransfers /var/www/francego
sudo find /var/www/francego -type d -exec chmod 755 {} \;
sudo find /var/www/francego -type f -exec chmod 644 {} \;
sudo chmod 600 /var/www/francego/.env

# 3. Configure UFW Firewall
sudo ufw default deny incoming
sudo ufw default allow outgoing
sudo ufw allow 22/tcp    # SSH
sudo ufw allow 80/tcp    # HTTP
sudo ufw allow 443/tcp   # HTTPS
sudo ufw enable

# 4. Disable Root SSH Login in /etc/ssh/sshd_config
# PermitRootLogin no
sudo systemctl restart ssh

# 5. Enable Fail2ban
sudo apt install -y fail2ban
sudo systemctl enable fail2ban && sudo systemctl start fail2ban
```

3. REST API & B2B Partner Reference

Authentication

Partner API endpoints authenticate via the `X-API-Key` HTTP header.

Endpoints Summary

HTTP Method	Endpoint Path	Purpose	Access Level
POST	`/api/v1/partner/bookings`	Create new private transfer reservation	Partner API Key
GET	`/api/v1/partner/bookings/{ref}`	Get real-time booking details & status	Partner API Key
PATCH	`/api/v1/partner/bookings/{ref}`	Update notes or cancel a booking	Partner API Key
GET	`/api/v1/partner/routes`	Query all 25 routes with fixed pricing	Partner API Key
POST	`/api/contact`	Submit customer contact inquiries	Public (Rate-limited)
GET	`/api/reviews/external`	TripAdvisor & Google aggregate reviews	Public

Partner Booking Creation Example (cURL)

```
curl -X POST "https://francegotransfers.io/api/v1/partner/bookings" \
     -H "Content-Type: application/json" \
     -H "X-API-Key: your_b2b_secret_partner_key_2026" \
     -d '{
       "originCode": "CDG",
       "destinationCode": "DLP",
       "pickupAddress": "Terminal 2F, Paris CDG",
       "dropoffAddress": "Disneyland Hotel, Paris",
       "pickupDateTime": "2026-11-20T14:00:00Z",
       "vehicleTier": "ECONOMY_VAN",
       "passengers": 5,
       "babySeats": 1,
       "customerName": "Robert Brown",
       "customerEmail": "robert.b@example.com",
       "customerPhone": "+447911987654"
     }'
```

4. Database Schema & Multi-Language System

Database Entity Structure

Table Name	Record Count	Description
`LocationCategory`	5 Categories	AIRPORT, AMUSEMENT_PARK, CITY_CENTER, TRAIN_STATION, PALACE.
`Location`	14 Locations	CDG, ORY, BVA, DLP, PAR, ASTX, GDN, VERS, GIV, FTB, CHMP, NORM, MSM, LOIRE.
`Route`	25 Routes	Header & footer routes with fixed 4-tier pricing (Sedan, Eco Van, VIP Van, Minibus).
`Booking`	Dynamic	Customer reservations, flight numbers, child seats, status tracking.
`Review`	Dynamic	Verified customer testimonials & ratings.
`ContactSubmission`	Dynamic	Lead tracking from the public contact desk.

Multi-Language Hybrid System

The platform employs an automated two-tier translation system:

1. **Native React Dictionaries (Layer 1):** High-converting, human-translated terminology for all UI navigation, buttons, badges, forms, and fleet specifications across **English (EN)**, **French (FR)**, **Spanish (ES)**, **Italian (IT)**, **German (DE)**, and **Portuguese (PT)**.
2. **Google Translate DOM Bridge (Layer 2):** A silent background client bridge that synchronizes with the user's selected language cookie (`googtrans=/en/code`) to dynamically translate database content (e.g., dynamic route titles, descriptions, and FAQs) across the entire DOM.
