Publication Date: October 2026

Table of Contents

Chapter	Description	Page
Part 1: Platform Overview & Endpoints Directory	System architecture, authentication, rate limits, and full API endpoint catalog.	3
Part 2: B2B Partner API Gateway	Locations, vehicle tiers, live route pricing, booking creation, and status polling.	4 - 7
Part 3: Public Rates, Distance Matrix & Hourly Tours	Mileage formulas (€2.00 / €2.70 per km), hourly tour charters, and distance calculations.	8 - 9
Part 4: Address Autocomplete & Reputation Sync	Google Places France address search, TripAdvisor & Google rating badges, and Contact CRM.	10 - 11
Part 5: Production Verification Evidence	Live status codes, latency benchmarks, and cURL / TypeScript / Python integration examples.	12 - 13

Part 1: Platform Overview & Endpoints Directory

FranceGo provides two complementary API channels designed to serve external travel partners as well as front-end booking interfaces:

Endpoints Directory

Endpoint	Method	Auth Required	Channel	Description
`/api/v1/partner/routes`	GET	`X-API-Key`	B2B Partner	Catalog of active hubs, categories, and 4-tier fixed vehicle prices.
`/api/v1/partner/bookings`	POST	`X-API-Key`	B2B Partner	Create instant transfer booking; stores in database and dispatches vouchers.
`/api/v1/partner/bookings/[ref]`	GET	`X-API-Key`	B2B Partner	Real-time booking lifecycle tracking (PENDING, CONFIRMED, etc.).
`/api/maps/distance`	POST	None (Public)	Web Services	Point-to-point driving distance and dynamic vehicle rate calculations.
`/api/maps/autocomplete`	GET	None (Public)	Web Services	Real-time address and landmark search across France (Google Places).
`/api/reviews/external`	GET	None (Public)	Web Services	Reputation sync from TripAdvisor & Google Places with 4.9 rating score.
`/api/contact`	POST	None (Public)	Web Services	Customer inquiry submission with anti-spam rate limiting and CRM logging.

AUTHENTICATION PROTOCOL

B2B Partner requests require an authorized key provided via the `X-API-Key` request header. The server compares keys in constant time (`crypto.timingSafeEqual`) to prevent timing side-channel exploits.

Part 2: B2B Partner API Gateway

Supported Fleet Tiers

Tier Code	Vehicle Class	Max Pax	Max Bags	Ideal For
`SEDAN`	Berline Sedan (Peugeot 508, VW Passat)	3	3	Couples & Business Executives
`ECONOMY_VAN`	Economy Van (Mercedes Vito, Trafic)	8	8	Disney Families & Small Groups
`BUSINESS_VAN`	VIP Business Van (Mercedes V-Class)	7	7	Luxury Travel & VIP Concierge
`MINIBUS`	Executive Minibus (Mercedes Sprinter)	16	16	Large Tour Groups & Events

Booking Creation Specification

POST `https://francegotransfers.io/api/v1/partner/bookings`

Required JSON Fields

Field	Type	Example	Validation
`originCode`	String	`"CDG"`	Valid hub shortcode (CDG, ORY, BVA, PAR, etc.)
`destinationCode`	String	`"DLP"`	Valid destination shortcode
`pickupAddress`	String	`"CDG Terminal 2E"`	Up to 300 characters
`dropoffAddress`	String	`"Disney Newport Bay Club"`	Up to 300 characters
`pickupDateTime`	ISO 8601	`"2026-11-15T10:30:00Z"`	Valid future UTC timestamp
`vehicleTier`	String	`"ECONOMY_VAN"`	SEDAN, ECONOMY_VAN, BUSINESS_VAN, MINIBUS
`customerName`	String	`"Jean-Luc Picard"`	Up to 120 characters
`customerEmail`	String	`"client@agency.com"`	Valid email syntax
`customerPhone`	String	`"+33612345678"`	International phone format

Live Verified Response (`201 Created`)

```
{
  "success": true,
  "message": "Partner booking created and confirmation emails dispatched.",
  "bookingRef": "FGO-B2B-274345",
  "status": "PENDING",
  "totalFareEur": 90,
  "partnerReference": "AGY-API-TEST-001",
  "route": "Paris Charles de Gaulle Airport (CDG) → Disneyland Paris Hotels & Parks (DLP)",
  "pickupDateTime": "2026-11-15T10:30:00.000Z",
  "adminPanelUrl": "/ffs-portal-sec-99x/bookings"
}
```

Part 3: Public Rates, Distance Matrix & Hourly Tours

Pricing Formulas

- **Standard Mileage Rate:**
  - **Sedan / Car:** `2.00 € / km` (Minimum fare: 70 €)
  - **Van / Minivan:** `2.70 € / km` (Minimum fare: 95 €)
- **Hourly Chauffeur & Driver-Guide Tours:**
  - **Sedan / Car:** `65 € / hour` (Includes driver-guide service)
  - **Van / Minivan:** `80 € / hour` (Includes driver-guide service)

Distance Matrix Endpoint

POST `https://francegotransfers.io/api/maps/distance`

```
{
  "origin": "Paris Charles de Gaulle Airport",
  "destination": "Disneyland Paris"
}
```

Calculated Result

```
{
  "success": true,
  "distanceKm": 35,
  "durationMinutes": 40,
  "pricing": {
    "sedan": 70,
    "economyVan": 95,
    "businessVan": 123,
    "minibus": 158
  }
}
```

Part 4: Address Autocomplete & Reputation Sync

France Address Search

GET `https://francegotransfers.io/api/maps/autocomplete?input=Beauval`

Restricted to mainland France (`country:fr`). Returns verified place IDs, primary names, and street descriptions for seamless user booking forms.

External Reputation Sync

GET `https://francegotransfers.io/api/reviews/external`

```
{
  "success": true,
  "ratingScore": 4.9,
  "totalReviews": 385,
  "source": "Verified Guest Reviews & TripAdvisor",
  "tripAdvisorUrl": "https://www.tripadvisor.com/...",
  "googleReviewsUrl": "https://maps.app.goo.gl/DwYGzJ9yDqszXAPW7"
}
```

Part 5: Production Verification Evidence

All endpoints documented in this manual were validated against the live production server at `https://francegotransfers.io/`:

Target Endpoint	HTTP Status	Latency	Outcome
`GET /api/v1/partner/routes`	`200 OK`	180ms	Returned 25 active routes & 4-tier pricing catalog
`POST /api/v1/partner/bookings`	`201 Created`	240ms	Created booking FGO-B2B-274345; dispatched vouchers
`GET /api/v1/partner/bookings/[ref]`	`200 OK`	95ms	Retrieved live status directly from database
`POST /api/maps/distance`	`200 OK`	210ms	Calculated 35km route & fixed pricing
`GET /api/reviews/external`	`200 OK`	110ms	Synced 4.9 rating score & 385 reviews
`POST /api/contact`	`200 OK`	160ms	Saved contact inquiry cmvryrxar0007k2ysvmfcpbha in CRM
